

by this situation place those responding to a fire, and the entire Sundance community at risk. We recommend negotiations be conducted between the District, Brickerhaven, and County to address these issues. On January 15, 2019, Gary Liddiard spoke with Brickerhaven's HOA president and was told they have no interest in joining the water district or making modifications to their system to address our concerns. Nonetheless, the fire threat that Brickerhaven represents is real and endangers all other community residents and District and County firefighters. It may be necessary for County to impose special requirements on this area to mitigate that threat.
